Professional Summary

A dedicated Frontend Developer with expertise in modern web development technologies, including HTML5, CSS3, Bootstrap, SCSS, JavaScript, TypeScript, Angular, and Material UI. Proficient in tools like Firebase, Postman, Axios, Python, and C, with a strong focus on responsive and user-friendly web applications. As a participant in the Digital Egypt Pioneers Initiative (DEPI) under the supervision of Next Academy, I honed advanced UI development skills, solving complex challenges and leading team-based projects. Currently completing my Bachelor's degree in Information Systems, I am passionate about enhancing user experiences and delivering high-quality web solutions.

Work Experience

Digital Egypt Pioneers Initiative (DEPI) – Egypt

Remote | 6 Months in 2024

Frontend Developer

- Participated in a government-led initiative focusing on advanced Frontend development and practical team-based projects.
- Led the design and development of HERFA : <https://herfa-finall.netlify.app>, an e-commerce platform for handmade crafts, utilizing Angular, Material UI, and Firebase.
- Managed the project lifecycle, including planning, design, implementation, and final delivery.
- Integrated secure user authentication and efficient database solutions using Firebase to enhance user experience.
- Improved team productivity through task delegation, progress tracking, and effective communication.
